

## Care and Cleaning Instructions for these Waterstone Finishes:

CH (Chrome)

SC (Satin Chrome)

### About Your Finish

These finishes are the most durable finishes Waterstone offers. The best general maintenance is regular cleaning. Even though these finishes are considered durable, you can never use any abrasive type cleaners, clothes, or pads to clean your fixture. Always try and keep your finishes clean and dry. Trapped moisture on the surface of your finish can lead to staining. Astringent cleaners, chlorine, bleach, along with acidic based organic cleansers are potentially harmful to these finishes.

Chrome plated finishes are very tarnish resistant. However, they are not indestructible and can scratch and mar.

### IMPORTANT NOTICE:

*It is the responsibility of the customer to check for any material finish defects **before** installation.*

### Suggested Finish Maintenance Procedures

1. Do not allow water spots to dry on the fixture.
2. Periodic cleaning can be done by applying denatured isopropyl alcohol with a soft clean cloth to gently remove surface spots.
3. Never use cleaners with abrasives, soft scrub, Clorox, any type of abrasive pad or sponge.
