

Care and Cleaning Instructions for these Waterstone Finishes:

- AB (Antique brass)
- AC (Antique Copper)
- AMB (American Bronze)
- AP (Antique Pewter)
- DAB (Distressed Antique Brass)
- DAC (Distressed Antique Copper)
- DAMB (Distressed American Bronze)
- DAP (Distressed Antique Pewter)
- PB (Polished Brass)
- PC (Polished Copper)
- PN (Polished Nickel)
- SN (Satin Nickel)
- VB (Venetian Bronze)

About Your Finish

These finishes have a clear protective coating on them. Even though they have a protective coating, they are only considered semi-durable. If the outside clear coating is scratched or damaged in any way, the base metal finishes exposed will oxidize. Any use of an abrasive cleanser, or any abrasive pad, cloth or sponge can remove or dull the protective coating and damage the finish. Some available sink cleaners with bleach, soaps, and hand lotions will damage the finish, as can acidic organic cleansers. Always wipe your fixture down with a clean soft cloth and keep it clean and dry after use.

IMPORTANT NOTICE:

*It is the responsibility of the customer to check for any material finish defects **before** installation.*

Suggested Finish Maintenance Procedures

1. Do not allow water spots to dry on the fixture. Keep the finish surface clean and dry after use.
2. Periodic cleaning can be done by using a mild diluted glass cleaner (we recommend Windex). Apply the mild cleaner to a soft clean cloth, and periodically wipe your fixture down to remove water spots and surface debris.
3. Never use cleaners with abrasives, soft scrub, Clorox, any type of abrasive pad or sponge.
